REAAAL SAFETY&SECURITY SYSTEM

REAAALINTGROUP.COM

Protecting the Lives and Property of our
Customers against the Hazards of Fire

APOUT US

Reaal International strives for progress in security and safety.

Since our establishment in March 25, 2012, as EST that contributes to society and works closely with firefighting authorities, Reaal International has tirelessly pursued technological development and service improvement under a corporate philosophy of protecting the lives and property of our customers against fire risks and hazards. We are deeply grateful for your encouraging guidance and support, which have been instrumental in enabling us to pursue a business approach that prioritizes quality and trustworthy technology. Prompted by the Fire Services, in addition to providing commercial property fire prevention services, in our efforts to protect precious lives and valuable property, we believe that we have contributed to reducing the incidence of fire-related fatalities and injuries and contributed to the development of a safer society through promotion of a wider usage of household fire alarms. We intend to take on the challenge of developing a new business model. We are striving for a major leap forward, both within and outside of Saudi Arabia, with a view to developing a fusion of fire prevention in addition to our conventional commercial property and household fire prevention products, while positively tackling such issues as environmental protection, electricity consumption reduction and the aging society. We are committed to taking a positive and forward-thinking approach to all issues based on a philosophy of safety and security, we look forward to your ongoing support for, and custom with Reaal International as we work to help create a more comfortable and thriving society while maintaining our original ethos of integrity, commitment and a fighting spirit.

- The Group provides a range of products and services (that include the supply, design, engineering, installation and maintenance) of:
 - Passive and Active fire protection, including fire extinguishing, fire stopping and fire suppression systems
 - Smoke/ heat extraction and Natural Ventilation systems
 - Fire alarm systems including, detection and control devices
 - Access control, CCTV, and other security systems
 - Risk management, risk assessment and training

MISSION & VISION

company overview

To maintain our premier position in a very challenging and dynamic market and also provide professional services in all aspects of our business To be amongst the top leading providers of fire protection and security systems in Middle East, with establish operations delivering quality products and services that are suitable for the region, effective and environmentally sustainable

Our Mission

To take pride in all aspects of our business and deliver High-Quality products and services Reaal International EST mission is to be a leading fire and security risk management organisation through the provision of fire detection , protection and extinguishment systems and in the deployment of access control/security systems in the Middle East. In doing so, we seek to ensure:

- that all products and services provided are of the highest standard and exceed the requirements of its customers at all times
- that the health and safety of its employees, customers, contractors and third parties are protected at all times
- that the products and systems that it deploys meet the highest environmental and international standards applicable to fire detection, fire extinguishment products and security systems
- that it delivers assured quality and reliability to all its customers at all times
- that staff receive the highest level of training and are provided with the best tools and equipment for carrying out their tasks in a safe environment

OUR VALUES

- | INTEGRITY
- | PROFESSIONALISM
- | VALUE FOR MONEY

These core values reflect what is truly important to us as an organisation. They do not change from time to time, situation to situation, or person to person, but rather they underpin our Group culture.

What we do can affect people's lives. It is important therefore that our customers can rely on us that we will do things right - we mean what we say and we do what we say.

We aspire to the highest quality standards in the fire and security industry internationally. Consequently we maintain the highest quality accreditation, constantly train our staff at all levels, and maintain accreditation and membership of international organisations related to the services we provide.

BUSINESS ACTIVITIES

Fire Protection and
Extinguishment

Access Control and
Security Solutions

PRODUCTS

Fire Detection Systems

Conventional & Addressable Intelligent Fire Alarm Panels / Workstations. Addressable Ionization Smoke Detectors, Optical Smoke Detectors, Optical Beam Detectors, Heat Detectors, Multi-Sensor Detectors, Flame Detectors, Video, LPG Gas Detectors, H2S Detectors, Manual Call Points, Alarm Bells, Sounders, Water Leak Detection System, and all forms of passive fire protection

Fire Detection Systems

Gaseous Fire Suppression Systems (FM200,NAF 227ea,NAF S125, Inergen, Novec, Argonite, Argon, Aerosol). Foam Based Fire Suppression System, Water Based Fire Suppression System (Water Mist, Hydrants, Sprinklers, Deluge Systems) Wet Chemical Kitchen hood Systems. Dry Mist Suppression system. Tube Technology Suppression System.

Smoke and Natural Ventilation

Comprehensive range of window activators, with reliable and proven control systems., Automatic Opening Vents (AOVs) , Mechanical Smoke Ventilation systems with powered fans , and Powered Extract systems.

Fire Extinguishers

Ozone Friendly Clean Agent Fire Extinguishers. ISI and KITE Marked ABC Dry Chemical Powder Fire Extinguisher, Carbon Dioxide Extinguishers, Water Type Fire Extinguishers, Wet Chemical Fire Extinguishers, Mechanical Foam, Water Mist, AFFF Foam Fire Extinguishers

HOCHIKI

AUTOMATIC FIRE EXTINGUISHMENT SYSTEMS

مترو الرياض

مترو الرياض

- We supply and install fixed dry and wet chemical extinguishing systems, as well as halogenated agent fire extinguishing, Halon alternative systems, and carbon dioxide fire extinguishing systems. We also install automatic systems based on specialist tube technology that enables a directly connected fire detection / discharge tube to act as an “all in one” detection and extinguishment system

شركة أحمد ونايف العويضة للصناعات

Ahmed & Naif Al-Owaidah Co. For Industries Ltd.

- In the event of a fire the detection tube ruptures at the hot spot and discharges the extinguisher contents directly on to the source of the fire

- Once correctly installed, our tube extinguishment systems provide constant automatic protection and require minimal maintenance

- An optional pressure switch can be fitted to the unit and will provide an optional facility to sound alarms shut down machinery, etc.

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations. It is not intended for use on an out-of-control fire, such as one which has reached the ceiling, endangers the user

Powder extinguishers are suitable for use on Class A, B and also Class C type fires involving flammable gasses such as propane and butane. Powder is also highly effective for electrical hazards.

CO2 Fire Extinguishers

Carbon Dioxide extinguishers are suitable for fires involving flammable liquids and electrical hazards. The non-corrosive and non-conductive qualities of CO2 make it an ideal choice for dealing with fires involving electrical equipment and machinery.

We supply a full range of Addressable Fire Alarm Systems from simple analogue systems to sophisticated fully integrated solutions for major buildings and installations We supply the following types of products from internationally renowned manufacturers:

- Heat detection
- Smoke detection
- VESDA - Very Early Warning System
- Voice evacuation
- Emergency lighting
- Exit lighting
- Messaging system
- Fire curtains

We also stock and supply:

- Remote communicators
- Bells
- Sounders
- Strobes
- Call points
- Control devices and modules

Zamil Plastic Industries Ltd

Fire Suppression capability covers a wide range of systems

- Water
- Water mist
- Fog systems
- Foam
- Foam mist
- Dry chemical
- CO2
- Hallatron
- FM200V
- Naff 125
- Inergen
- Novec
- Argonite
- Argon
- Aerosol
- Tube technology

FIRE SUSPENSION SYSTEMS

FIRE EXTINGUISHING SYSTEMS

FIRE ALARM

FIRE SUSPENSION SYSTEMS

We use specialist fire sprinkler hydraulic calculation software that enables us to carry out hydraulic calculations of fire sprinkler systems, water mist, medium and high velocity water spray systems, hydrants and foam/ water monitors systems. Our FHC hydraulic calculation software complies with 16 different national and international design standards including EN 12845, BS 9251, FM, NFPA, CP 52, ASIB, and AS2118.1 for fire sprinkler systems. It enables us to make correct configuration of the systems we install
